

How To Escape Mediocrity & Get Ahead of 99% of People

~ Cal Newport.

1. ^{idea} ~~There~~ of output is often slower but it does come out, its more impact, & it ^{earns} engenders more respect.
2. Serious Thinking is the goal you need to pursue
Practice 1
3. Improve the quality & decrease the quantity of information that you consume.
4. Social Media → wants to make you engage as possible not informed.
5. Engage at a slower scale, deeper understanding, slower scale → DAILY BASIC.
6. Deeper sense of whats going on.
7. Serious thinker → have no interest for algorithmic curated social media information
Practice 2
8. INCREASE YOUR COMFORT WITH BOREDOM
9. Serious thinking requires to keep your attention sustain on a single abstract topic & that boring (dont feed it shiny digital treat)
10. Have 1 particular thing throughout the day that you do w/o your phone (it does have to be long)
YOU NEED TO BE ALONE WITH YOUR OWN THOUGHTS

11. PHONE FOYER METHOD

↳ plugged in → somewhere in your home
→ if you wanna check it, you need to go to that place

You have to go to where the phone is. It is not where you are.

Here → you are seeing the permanent accessibility of the distraction

Practice 3

12. CULTIVATE YOUR ABILITY TO PAY ATTENTION

13. Let your mind comfortable with sustaining attention.

↳ INTERVAL TRAINING

14. Can include high quality leisure activity like watching movie

↳ Do that with as much concentration you can muster. Zero checks of anything screened.

15. Put that timer (say 10 min for start) & if you break that concentration you have to start that timer again & start it over. It doesn't count.

Once you're able to consistently hit the current time duration → increase it by 10 min.

16. Care about rituals, care about environment (set up this is where I go to read)

Ritual & environment will help you fall into that deeper attention mode.

Reading multiple layers below the surface
READ GREAT BOOK

Practice 4.2

17. STRENGTHEN YOUR WORKING MEMORY

↳ productive Medication

↳ you take a complicated problem, go for a walk & you try to make progress on that problem only using your head

18. Walking quiets some noises in your cognitive circuit. When you notice your attention wandering away you move back your attention to the problem (It is directly increasing your working memory)

Practice 5.2

19. PRACTICE BEING INTELLECTUAL

↳ you are engaging with the world of information

20. Secondary sources first (how to read the hard book before to read the hard book → think in multiple layers)

21. Relationship with things content (who was the artist, what was he thinking, what did he do over just staring at the painting)

RETROSPECTIVE ESSAYS

22. Read about the secondary sources based on the primary source (seeing level below the surface)

23. Maintain idea documents (how you feel about this & why) (Articulate my concerns) (organize your thoughts)

24. Your brain is the number 1 portal to the world. Train it to be a serious thinker & your experience of the world changes the techno color.
